

Dot Diagram Practice for Atoms and Ions – practice #1

For each atom...

- Write the name of the atom.
- Write the name of the ION formed. (Remember that negative ions will end in -IDE.)
- Write how many electrons are gained or lost to form the ion.
- Draw the electron dot diagram for the neutral atom.
- Draw the electron dot diagram for the ion formed.

EXAMPLE 1 – Na

- sodium
- sodium
- lost 1
-

e)

EXAMPLE 2 – I

- chlorine
- chloridee
- gained 1
-

e)
